The 2007/08 Yamaha YZF-R1 is a bit of a strange model because it is very much a stop-gap before Yamaha introduced a radical redesign in the shape of the first crossplane R1 in 2009. However that also makes it quite an interesting machine because as well as being the first R1 to gain a ride-by-wire throttle, the 2007 update also marked a radical departure for Yamaha as it was the first top-end sportsbike not to feature the firm's five-valve head since the FZ750 introduced the design in 1985.
