HDM Chapter 19 - Reinforced Concrete Box Culverts and Similar Structures. Purpose: The purpose of this chapter is to discuss requirements for designing reinforced concrete culverts and to provide guidance about the information to include in the contract documents, where to present the information, and details for cast-in-place culverts.

Chapter 19

The building is a staggered series of irregular boxes, with cantilevers ranging from 10ft to 25ft, and every floorplate had to be able to support itself. WSP used a very strong concrete structure - 12,000psi at the lower levels and 7,000psi further up - concealed to allow a completely glazed exterior with views from almost every angle.
