Magnificently illustrated with spectacular colour photographs and galleries of species illustrations, diagrams, and maps, this book reveals the fascinating world of fishes in an authoritative and stimulating way.

Presents a survey of all animal groups, with diagrams, distribution maps, color photographs, and overviews of animal evolution, behavior, habitats, and adaptation.

Provides comprehensive information on the planet, including its geological history, physical composition, weather, and humankind's relationship with the Earth.

Whether it's the planet, the petri dish or the platform, this reference attempts to shed some light on the subject. It includes over 10,000 entries and many articles describing discoveries and ground-breaking experiments and is fully cross-referenced.

Arranged in a unique topic-by-topic order, the Hutchinson Pocket Encyclopedia from ancient history to sporting facts and figures. Compiled by over 25 expert consultants, it gives a clear outline for each subject, including chronologies, biographies, and common terms, together with over 200 maps, tables, and diagrams.

An encyclopedia covering all areas of music.

Inland aquatic habitats occur world-wide at all scales from marshes, swamps and temporary puddles, to ponds, lakes and inland seas; from streams and creeks to rolling rivers. Vital for biological diversity, ecosystem function and as resources for human life, commerce and leisure, inland waters are a vital component of life on Earth. The Encyclopedia of Inland Waters describes and explains all the basic features of the subject, from water chemistry and physics, to the biology of aquatic creatures and the complex function and balance of aquatic ecosystems of varying size and complexity. Used and abused as an essential resource, it is vital that we understand and manage them as much as we appreciate and enjoy them. This extraordinary reference brings together the very best research to provide the basic and advanced information necessary for scientists to understand these ecosystems – and for water resource managers and consultants to manage and protect them for future generations. Encyclopedic reference to Limnology - a key core subject in ecology taught as a specialist course in universities Over 240 topic related articles cover the field Gene Likens is a renowned limnologist and conservationist, Emeritus Director of the Institute of Ecosystems Research, elected member of the American Philosophical Society and recipient of the 2001 National Medal of Science Subject Section Editors and authors include the very best research workers in the field
