An animal that has  
adequate analgesia is  
more likely to eat, heal  
quicker and be a  
generally happier  
patient. Speak to the  
veterinary surgeon if

# Get Free Food Animal Surgery

you feel a patient requires analgesia. Good nutrition is vital to an animal's ability to heal. Good nutrition does not mean feeding large quantities of chicken or fish.

Depending on the type of surgery your dog has

# Get Free Food Animal Surgery

undergone, your veterinarian will advise you on the best way to feed them. For some digestive issues, the surgery may involve placing a feeding tube so it leads directly into your dog's stomach or esophagus, bypassing any organs that may be functioning poorly.

## **after surgery—ROYAL CANIN® - Royal Canin**

‘The best food to offer your dog after surgery is a “light and white” diet, such as cooked chicken and rice, which dogs find easier to digest than normal pet foods,’ Brian recommends.

Your pet is likely to regain his appetite within 24 hours and, if

# Get Free Food Animal Surgery

he's eaten his lighter meals without a problem, you can then slowly reintroduce his normal food over the course of a day or two.

## **Animal Surgery 5th Edition**

If your dog has undergone a large surgery or is having ongoing radiation treatments or chemotherapy, you may need to feed them a recovery diet for up to a week or even longer. However, if your dog has simply had a slightly upset stomach

# Get Free Food Animal Surgery

and did not visit the vet, and you wish to tempt them back into eating while ensuring that you do not trigger off the problem again, just a day will usually be fine.

Withholding food has similar variations, with fasting times ranging

# Get Free Food Animal Surgery

from 6 to 12 hours preoperatively. Much of the issue around preoperative fasting times, in animal and human patients, is associated with the volume and acidity of gastric contents at induction of anaesthesia, which depends on the length of fasting time and type of food ingested.
