From the respected instructor and author Paul Addison, PRINCIPLES OF PROGRAM DESIGN: PROBLEM SOLVING WITH JAVASCRIPT gives your students the fundamental concepts of good program design, illustrated and reinforced by hands-on examples using JavaScript. Why JavaScript? It simply illustrates the programming concepts explained in the book, requires no special editor or compiler, and runs in any browser. Little or no experience is needed because the emphasis is on learning by doing. There are examples of coding exercises throughout every chapter, varying in length and representing simple to complex problems. Students are encouraged to think in terms of the logical steps needed to solve a problem and can take these skills with them to any programming language in the future. To help reinforce concepts for your students, each chapter has a chapter summary, review questions, hand-on activities, and a running case study that students build on in each chapter. symbols of devoted service to their country but as the kind of man every woman wants to love. They'll rescue a damsel in distress and her lap dog, too. They'll battle hometown dramas and international bad guys. When it comes to giving away their hearts, they'll risk everything. All proceeds from sales of SEAL of My Dreams goes to the Veterans Research Corporation, a non-profit fundraiser for veterans' medical research. Among them, the authors of SEAL of My Dreams have won dozens of writing awards including multiple RITAs from Romance Writers of America. Their nearly 600 published novels have sold at least 25 million copies worldwide. The SEAL of My Dreams roster includes many of the best-known authors in modern romance fiction. In addition, many have strong family connections to the servicemen and women of our nation's military, and many specialize in novels featuring heroes and heroines from all branches of service. What drives a man to travel to sixty countries and spend a fortune to count birds? And what if that man is your father? Richard Koepfel's obsession began at age twelve, in Queens, New York, when he first spotted a Brown Thrasher, and jotted the sighting in a notebook. Several decades, one failed marriage, and two sons later, he set out to see every bird on earth, becoming a member of a subculture of competitive bird watchers

worldwide all pursuing the same goal. Over twenty-five years, he collected over seven thousand species, becoming one of about ten people ever to do so. *To See Every Bird on Earth* explores the thrill of this chase, a crusade at the expense of all else—for the sake of making a check in a notebook. A riveting glimpse into a fascinating subculture, the book traces the love, loss, and reconnection between a father and son, and explains why birds are so critical to the human search for our place in the world.

"Marvelous. I loved just about everything about this book."—Simon Winchester, author of *The Professor and the Madman* "A lovingly told story . . . helps you understand what moves humans to seek escape in seemingly strange other worlds."—Stefan Fatsis, author of *Word Freak* "Everyone has his or her addiction, and birdwatching is the drug of choice for the father of author Dan Koepfel, who writes affectionately but honestly about his father's obsession."—Audubon Magazine (editor's choice) "As a glimpse into human behavior and family relationships, *To See Every Bird on Earth* is a rarity: a book about birding that nonbirders will find just as rewarding."—Chicago Tribune

In *Buying Military Transformation*, Peter Dombrowski and Eugene Gholz analyze the United States military's ongoing effort to capitalize on information technology. New ideas about military doctrine derived from

# Online Library Gliderol Gts Manual

comparisons to Internet Age business practices can be implemented only if the military buys technologically innovative weapons systems. *Buying Military Transformation* examines how political and military leaders work with the defense industry to develop the small ships, unmanned aerial vehicles, advanced communications equipment, and systems-of-systems integration that will enable the new military format. Dombrowski and Gholz's analysis integrates the political relationship between the defense industry and Congress, the bureaucratic relationship between the firms and the military services, and the technical capabilities of different types of businesses. Many government officials and analysts believe that only entrepreneurial start-up firms or leaders in commercial information technology markets can produce the new, network-oriented military equipment. But Dombrowski and Gholz find that the existing defense industry will be best able to lead military-technology development, even for equipment modeled on the civilian Internet. The U.S. government is already spending billions of dollars each year on its "military transformation" program-money that could be easily misdirected and wasted if policymakers spend it on the wrong projects or work with the wrong firms. In addition to this practical implication, *Buying Military Transformation* offers key lessons for the theory of "Revolutions in Military Affairs."

# Online Library Gliderol Gts Manual

A series of military analysts have argued that major social and economic changes, like the shift from the Agricultural Age to the Industrial Age, inherently force related changes in the military. Buying Military Transformation undermines this technologically determinist claim: commercial innovation does not directly determine military innovation; instead, political leadership and military organizations choose the trajectory of defense investment. Militaries should invest in new technology in response to strategic threats and military leaders' professional judgments about the equipment needed to improve military effectiveness. Commercial technological progress by itself does not generate an imperative for military transformation. Clear, cogent, and engaging, Buying Military Transformation is essential reading for journalists, legislators, policymakers, and scholars.
