Pioneering cultural critic Cindy Patton looks at the complex interaction between modern science, media coverage, and local activism during the first decade of the epidemic.

This book was conceived out of the spirit of the pure curiosity that evolved through an entire generation of death and fear around something as mysterious and puzzling as was the virus that was killing millions through sexual intercourse. The original and reason for the existence of a sexually transmittable disease like HIV/AIDs is no novelty to mankind and societies of Human beings.

Though largely forgotten today, the 1949 film *Pinky* had a significant impact on the world of cinema. Directed by Elia Kazan, the film was a box office success despite dealing with the era's most taboo subjects--miscegenation and racial passing--and garnered an Academy Award nomination for its African American star, Ethel Waters. It was also historically important: when a Texas movie theater owner showing the film was arrested for violating local censorship laws, his case went to the U.S. Supreme Court, which ruled the censorship ordinance unconstitutional. In *Cinematic Identity*, Cindy Patton takes *Pinky* as a starting point to meditate on the critical reception of this and other "problem films" of the period and to explore the larger issues they raise about race, gender, and sexuality. It was films like *Pinky*, Patton contends, that helped lay the groundwork for a shift in popular understanding of social identity that was essential to white America's ability to accept the legitimacy of the civil rights movement. The production of these films, beginning with 1949's *Gentleman's Agreement*,

coincided with the arrival of the Method school of acting in Hollywood, which demanded that performers inhabit their characters' lives. Patton historicizes these twin developments, demonstrating how they paralleled, reflected, and helped popularize the emerging concept of the liberal citizen in postwar America, and in doing so illustrates how the reception of projected identities offer new perspectives on contemporary identity politics, from feminism to the gay rights movement. Cindy Patton holds the Canadian Research Chair in Community Culture and Health at Simon Fraser University, where she is professor of women's studies and sociology. Her books include *Inventing AIDS*, *Fatal Advice: How Safe-Sex Education Went Wrong*, and *Globalizing AIDS* (Minnesota, 2002).

AIDS and the Distribution of Crises engages with the AIDS pandemic as a network of varied historical, overlapping, and ongoing crises born of global capitalism and colonial, racialized, gendered, and sexual violence. Drawing on their investments in activism, media, anticolonialism, feminism, and queer and trans of color critiques, the scholars, activists, and artists in this volume outline how the neoliberal logic of "crisis" structures how AIDS is aesthetically, institutionally, and politically reproduced and experienced. Among other topics, the authors examine the writing of the history of AIDS; settler colonial narratives and laws impacting risk in Indigenous communities; the early internet regulation of both content and online AIDS activism; the Black gendered and sexual politics of pleasure, desire, and (in)visibility; and how persistent attention to white men has shaped AIDS as intrinsic to multiple, unremarkable crises among people of color and in the Global South. Contributors: Cecilia Aldarondo, Pablo Alvarez, Marlon M. Bailey, Emily Bass, Darius Bost, Ian Bradley-Perrin, Jih-Fei Cheng, Bishnupriya Ghosh, Roger Hallas, Pato Hebert, Jim Hubbard, Andrew J. Jolivet, Julia S. Riley Snorton, Eric A. Stanley, Jessica Whitbread, Quito Ziegler

This book explores the normalization of HIV and AIDS, reflecting upon the intended and unintended consequences of the multifarious "AIDS industry." *The Normalization of the HIV and AIDS Epidemic in South Africa* deals with the manner in which the HIV and AIDS epidemic has become such a well-known disease with such wide-ranging ramifications. With its focus on the "AIDS industry," this book examines issues such as the framing of the HIV and AIDS epidemic in a manner that greatly fostered notions of stigmatization and moralization. This book looks at the complexities of dealing with the epidemic in contemporary South Africa, examining the difficulties of addressing the social aspects of a disease in the context of increased focus on technological quick-fix solutions. De Wet explores these issues thoroughly, looking at the social determinants of the spread of the disease as well as the configuration and the nature of the responses to it, and their increasing marginalization as factors to address in an era of increased biomedicalization and concomitant normalization. This book will intrigue scholars and students of public health, global health care, medical sociology, and African Studies.

Explores the relationships between the national state, globalization and sexual dissidence.

Increasingly, identities are the site for interdisciplinary initiatives and identity research is at the heart of many transdisciplinary research centres around the world. No single social science discipline 'owns' identity research which makes it a difficult topic to categorize. The SAGE Handbook of Identities systematizes this complex field by incorporating its interdisciplinary character to provide a comprehensive overview

of its themes in contemporary research while still acknowledging the historical and philosophical significance of the concept of identity. Drawing on a global scholarship the Handbook has four parts: Part 1: Frameworks presents the main theoretical and methodological perspectives in identities research. Part 2: Formations covers the major formative forces for identities such as culture, globalisation, migratory patterns, biology and so on. Part 3: Categories reviews research on the core social categories which are central to identity such as ethnicity, gender, sexuality, disability and social class and intersections between these. Part 4: Sites and Context develops a series of case studies of crucial sites and contexts where identity is at stake such as social movements, relationships and family life, work-places and environments and citizenship.

WINNER, 2017 RACHEL CARSON PRIZE, SOCIETY FOR THE SOCIAL STUDIES OF SCIENCE In 2002, Sierra Leone emerged from a decadelong civil war. Seeking international attention and development aid, its government faced a dilemma. Though devastated by conflict, Sierra Leone had a low prevalence of HIV. However, like most African countries, it stood to benefit from a large influx of foreign funds specifically targeted at HIV/AIDS prevention and care. What Adia Benton chronicles in this ethnographically rich and often moving book is how one war-ravaged nation reoriented itself as a country suffering from HIV at the expense of other, more pressing health concerns. During her fieldwork in the capital, Freetown, a city of one million people, at least thirty NGOs administered internationally funded programs that included HIV/AIDS prevention and care. Benton probes why HIV exceptionalism—the idea that HIV is an exceptional disease requiring an exceptional response—continues to guide approaches to the epidemic worldwide and especially in Africa, even in low-prevalence settings. In the fourth decade since the emergence of HIV/AIDS, many today are questioning whether the effort and money spent on this health crisis has in fact helped or exacerbated the problem. HIV Exceptionalism does this and more, asking, what are the unanticipated consequences that HIV/AIDS development programs engender?

What is the role of the author in times of crisis? *Modernist Crisis and the Pedagogy of Form* examines how Virginia Woolf, Samuel R. Delany, and J. M. Coetzee developed literary strategies in common to cope with crisis periods they were anticipating, living through, or looking back on. Matthew Cheney outlines how the three writers shaped their art to create an author/audience relationship congruent with the goals of critical pedagogy espoused by such thinkers as Paulo Freire and bell hooks. Seeking to stimulate ethical thought, Woolf, Delany, and Coetzee required their readers to be active interpreters of their texts' forms, contents, and contexts. By pushing against fiction's fictionality, these writers of very different backgrounds, geographies, privileges, situations, tastes, and styles discovered complex ways to address the world wars in England, the AIDS crisis in New York, and apartheid in South Africa, going so far as to question the value of fiction itself.
