The American Heart Association recommends at least 150 minutes of moderate-intensity aerobic activity each week. You can knock that out in just 30 minutes a day, 5 days a week. And every minute of moderate to vigorous activity counts toward your goal. So, this is easy! Just move more, with more intensity, and sit less.

~~Why is physical activity so important for health and ...~~

The benefits of practicing sports for your health and wellness are several. Among the best known and expected are weight control and weight loss. Meet five other health benefits: Decreases the risk of heart disease, high blood pressure, osteoporosis, diabetes, and obesity; Increases muscular endurance;

~~How fitness health and wellness are interrelated — Actual ...~~

Organizations can't establish reliable competency standards that rely on health, wellness or physical fitness. Unhealthy, unwell and unfit personnel cannot provide high levels of physical protection for employees and others. Organizations can't establish reliable training programs that relay on health, wellness and physical fitness.

~~What is Physical Fitness? — Health Galaxy.com~~

The important take-home message for physical therapists and other health care providers is that both health and wellness encompass more than physical health, and efforts that focus primarily on physical health (eg, physical activity, weight management, nutrition), although important, fail to recognize the influence of the other dimensions to overall well-being.

~~Promoting Health and Wellness: Implications for Physical ...~~

This is why "wellness," not just fitness, is so important. Wellness is the state of health, state of balance, if you will, in not just your physical body, but also your energy body (in other words, your spirit), your mind (the way you think and how it affects your life), and your emotions (the way you understand them, feel them and use them as guides).

Exercise and physical activity are great ways to feel better, boost your health and have fun. For most healthy adults, the Department of Health and Human Services recommends: At least 150 minutes a week of moderate aerobic activity or 75 minutes a week of vigorous aerobic activity, or a combination of moderate and vigorous activity.

~~Exercise: 7 benefits of regular physical activity — Mayo ...~~

Lifestyle plays a huge role in health, wellness and fitness. Today's urban lifestyle where one doesn't stop and take time for themselves is causing more harm than good when it comes to physical and emotional health. Lack of healthy eating options has contributed to obesity in many individuals of all age groups today.

~~How lifestyle can affect your health and fitness?~~

The difference between Fitness and Wellness. Wellness is far broader than fitness. Wellness encapsulates your entire life, whereas Fitness tends to focus on your physical health. It tends to focus on nutrition, strength, conditioning, flexibility, and body composition. Wellness includes many more modalities of health.
