When nursing began it had very little to do with formal medical training and everything to do with your gender and willingness to do the job. In the early days of nursing, women learned medical skills from their mothers or other women in the same profession. It wasn't really seen as a respected trade, but women weren't really seen as a respectable gender, either.

How Nursing Has Changed Over Time - Minority Nurse

The healthcare industry was changed forever in 1948, when the National Health Service was founded, offering free treatment for all patients in the UK at the point of care. In 1972, the Briggs Committee suggested that all nurses should be prepared through degree study with research-based practice, forging the path for modern nursing education.

The History of Nursing: How has the Career Changed?

Nursing is now a degree-level qualification and evidence shows that graduate nurses reduce morbidity rates and improve patient outcomes. The increased focus on research within nursing means that the healthcare professionals who work most closely with patients can not only identify problems but are also empowered to form the evidence base that leads to a direct improvement in the level of care that patients receive.
