With over 40 years of skid loader manufacturing experience, Mustang has taken performance to the next level with the 2200R skid steer loader. Net Power (kW) 70.7 hp (53.7)

The epic story also told in the film FORD V. FERRARI: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no

American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.

Guide to information on ... cars and light trucks.

This book is designed to present, in one convenient source, comments published in periodicals about 325 automobile models manufactured since 1987 on a model-by-model basis. These periodicals range from general interest to specialized sources as well as repair manuals and other publications related to the individual models.

In an intense, emotional mystery that spans a decade in the life of a small town, bestselling author Brian Freeman brings us an unforgettable heroine who discovers that the dead may sometimes be easier to rescue than the living. Deputy Shelby Lake was abandoned as a baby, saved by a stranger who found her in the freezing cold. Now, years later, a young boy is missing—and Shelby is the one who must rescue a child. The only evidence of what happened to ten-year-old Jeremiah Sloan is a bicycle left behind on a lonely road. After a desperate search fails to locate him, the close bonds of Shelby's hometown begin to fray under the weight of accusations and suspicion. Everyone around her is keeping secrets. Her adoptive father, her best friend, her best friend's young daughter—they all have something to hide. Even Shelby is concealing a mistake that could jeopardize her career and her future. Unearthing the lies of the people in Jeremiah's life doesn't get the police and the FBI any closer to finding him. As time passes and the case grows cold, Shelby worries that the mystery will stay buried forever under the deep, deep snow. But even the deepest snow melts in the spring. When a tantalizing clue finally comes to light, Shelby must confront the darkest lie of all. Exposing the truth about Jeremiah will leave no one's life untouched—including her own.

Presenting a comprehensive overview of the design automation algorithms, tools, and methodologies used to design integrated circuits, the Electronic Design Automation for Integrated Circuits Handbook is available in two volumes. The second volume, EDA for IC Implementation, Circuit Design, and Process Technology, thoroughly examines real-time logic to GDSII (a file format used to transfer data of semiconductor physical layout), analog/mixed signal design, physical verification, and technology CAD (TCAD). Chapters contributed by leading experts authoritatively discuss design for manufacturability at the nanoscale, power supply network design and analysis, design modeling, and much more. Save on the complete set.
