ITI Technician Power Electronics Systems is a simple e-Book for ITI Power Electronics Systems JOB Interview & Exam. It contains objective questions with underlined & bold correct answers MCQ covering all topics including all about safety and environment, use of fire extinguisher, trade tools & its standardization, familiarize with basics of electricity, test the cable and measure the electrical parameter, maintenance of batteries, active electronic components, soldering and de-soldering of various types of electrical and electronic components.

This Book contains 500+ Electrical Interview Question for Electrical Engineering Graduates. It is designed based on personal experience and survey from students and includes most asked questions. Questions from various subjects viz. Power System, Electrical Machine, Power Electronics, Microprocessor, Digital Electronics etc have been included. It will work as ready reference for candidate preparing for interview session for core Electrical Company. If you fully and thoroughly go through the Book, you can answer almost 80% questions asked in any electrical interview session. This Book is an effort to help fresh electrical graduates to land to their dream job. Whether it is college campus interview or off campus interview, this Book will prove to be a success key for aspirants.

Petrogav International provides courses for participants that intend to work on offshore drilling and production platforms. Training courses are taught by professionals from the oil and gas industry with current knowledge and years of field experience. The participants will get all the necessary competencies to work on the offshore drilling platforms and on the offshore production platforms. It is intended also for non-drilling and non-production personnel who work in drilling, exploration

and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. This course provides a non-technical overview of the phases, operations and terminology used on offshore oil and gas platforms. It is intended also for non-production personnel who work in the offshore drilling, exploration and production industry. This includes marine and logistics personnel, accounting, administrative and support staff, environmental professionals, etc. No prior experience or knowledge of drilling operations is required. This course will provide participants a better understanding of the issues faced in all aspects of production operations, with a particular focus on the unique aspects of offshore operations.

The book contains 256 questions and answers for job interview for hiring on onshore drilling rigs.
