Nailer is part of a crew that breaks up tankers that are no longer in use. Because he's small, he's able to access smaller places in the ship. As he's working with a crewmember, Sloth, though, he falls into a vat of oil. Sloth decides to leave him to his fate (not super nice), and Nailer eventually finds his way out and tumbles into the ocean.

Soldier boys emerged from the darkness. Guns gleamed dully. Bullet bandoliers and scars draped their bare chests. Ugly brands scored their faces. She knew why these soldier boys had come. She knew what they sought, and she knew, too, that if they found it, her best friend would surely die. In a dark future America where violence, terror, and grief touch everyone, young refugees Mahlia and Mouse have managed to leave behind the war-torn lands of the Drowned Cities by escaping into the jungle outskirts. But when they discover a wounded half-man--a bioengineered war beast named Tool--who is being hunted by a vengeful band of soldiers, their fragile existence quickly collapses. One is taken prisoner by merciless soldier boys, and the other is faced with an impossible decision: Risk everything to save a friend, or flee to a place where freedom might finally be possible. This thrilling companion to Paolo Bacigalupi's highly acclaimed Ship Breaker is a haunting and powerful story of loyalty, survival, and heart-pounding adventure.

thinking about where their food comes from. The zombie apocalypse begins on the day Rabi, Miguel, and Joe are practicing baseball near their town's local meatpacking plant and nearly get knocked out by a really big stink. Little do they know the plant's toxic cattle feed is turning cows into flesh-craving monsters! The boys decide to launch a stealth investigation into the plant's dangerous practices, unknowingly discovering a greedy corporation's plot to look the other way as tainted meat is sold to thousands all over the country. With no grownups left they can trust, Rabi and his friends will have to grab their bats to protect themselves (and a few of their enemies) if they want to stay alive...and maybe even save the world.

Paolo Bacigalupi's debut collection demonstrates the power and reach of the science fiction short story. Social criticism, political parable, and environmental advocacy lie at the center of Paolo's work. Each of the stories herein is at once a warning, and a celebration of the tragic comedy of the human experience. The eleven stories in *Pump Six* represent the best Paolo's work, including the Hugo nominee "Yellow Card Man," the nebula and Hugo nominated story "The People of Sand and Slag," and the Sturgeon Award-winning story "The Calorie Man."

In "The People of Sand and Slag," a Hugo and Nebula Award-nominated short story, Paolo Bacigalupi weaves a tale about the lives of three technologically modified guards, their barren, heavily mined landscape, and a chance encounter with a creature rare for their time period – a dog. What starts off as a hunt for an enemy ends up as a story of empathy, and what it means to be human. "The People of Sand and Slag" was nominated for the 2005 Hugo Award for Best Novelette, and the 2006 Nebula Award for Best Novelette. It was featured in Gardner Dozois' s "Year' s Best SF" Twenty-Second Edition, Jonathan Strahan' s "Best SF of the Year" 2004 Edition, and in John Joseph Adams' "Wastelands" Anthology in 2008. Reviews: "A difficult and touching story, which steps pretty far outside the box to examine our relationship to pets, and to nature. At every stage, Bacigalupi gets it right." --- Internet Review of Science Fiction "Bacigalupi posits a future where humanity has adapted itself to living in a hostile environment. ... There is plenty of techie stuff entwined with the premise itself to satisfy the hardest of hard sf readers, but the main attraction of this story is the faint hope that those parts of us that can accept the "other" might still exist in a world where self-preservation and survival come first." --- Tangent Online

Anderson Lake is a company man, AgriGen's Calorie Man in Thailand. Under cover as a factory manager, Anderson combs Bangkok's street markets in search of foodstuffs thought to be extinct, hoping to reap the bounty of history's lost calories. There, he encounters Emiko... Emiko is the Windup Girl, a strange and beautiful creature. One of the New People, Emiko is not human; instead, she is an engineered being, creche-grown and programmed to satisfy the decadent whims of a Kyoto businessman, but now abandoned to the streets of Bangkok. Regarded as soulless beings by some, devils by others, New People are slaves, soldiers, and toys of the rich in a chilling near future in which calorie companies rule the world, the oil age has passed, and the side effects of bio-engineered plagues run rampant across the globe. What happens when calories become currency? What happens when bio-terrorism becomes a tool for corporate profits, when bio-terrorism's genetic drift forces mankind to the cusp of post-human evolution?
