NASA's Near-Earth Asteroid Scout is tucked away safely inside the agency's powerful Space Launch System (SLS) rocket at NASA's Kennedy Space Center in Florida. The solar sailing CubeSat is one of ...

NASA solar sail asteroid mission readies for launch on Artemis-4
Four newly discovered planets could help scientists learn more about how the Earth and our solar system developed during their 'teenage' years. The exoplanets reside around 130 light years away and ...

Newly discovered planets could help scientists learn more about Earth's 'teenage' years
But some scientists believe we may soon be able to prove that they are a real part of the universe—as real as the sun and the stars or you and I. The scientific term for this exotic object is an ...

The hunt for wormholes: How scientists look for space-time tunnels
A new method for seeing through ice sheets using radio signals from the sun could enable cheap, low-power and widespread monitoring of ice sheet evolution and contribution to sea-level rise.

Solar radio signals could be used to monitor melting ice sheets
International Advanced Research Centre for Powder Metallurgy and New Materials (ARCI) has established a concentrated solar thermal-based test rig facility at Hyderabad that can help India's solar ...

ARCI sets up concentrated solar thermal-based test rig facility in Hyderabad
Scientists have long tested solar energy in space, but it may soon arrive on the moon — in the form of rovers equipped with solar panels. On unmanned moon missions, these petite robotic vehicles will ...

Solar-powered Moon rovers will help scientists seek lunar ice
Astronomers have discovered four nearby exoplanets they hope will help scientists learn about Earth's poorly understood teenage years.

Four newly found exoplanets may offer insights into Earth's teenage years
A short suborbital jaunt to the edge of space for most people requires having a lot of spare cash on hand, for now.

What will it cost to fly Virgin Galactic to space?
From signs and symbols to secret ciphers and swatches, NASA rovers have several markings that reflect their missions to Mars.

NASA Easter Eggs: Hidden Details and Codes Found on Mars Rovers
Researchers in the United States are using autonomous drones to photograph and then analyze little-known meteorite impact sites, looking for small, well-hidden pieces of space rock ...

AI and autonomous drones are hunting for meteorite impact
News reports, trends, analysis and Daily Updates on Business, New Emerging Technology, Startups, Funding, and Innovation in India and across the World ...

New Solar Thermal Components Testing Facility at Hyderabad to Give Further Fillip to India's Growing Solar Sector
NASA has announced plans to test its updated solar sail technology in 2022. known as ACS3 (advanced composite solar sail system), the aim of the mission is to replace conventional rocket propellants ...

NASA's solar sail technology wants to power space exploration using sunlight
Ramez Naam discusses the affordability of clean energy, predicting that solar and wind will become widely adopted in the near future. He also speaks about his own work in science fiction, emphasizing ...

Does affordable clean energy make economic growth and environmentalism compatible? My long-read Q&A with Ramez Naam
Why spend so much time and money on this one planet when there are at least seven others in our solar system, more than 200 ... landing unscathed at the Woomera Test Range in Australia.

Mars, sehmars — let's explore these other planets instead
Chinese scientists are planning to fire more than 20 rockets into space to divert an asteroid impact that has a small chance of one day ending life on Earth. Their target is an asteroid named Benu, a ...

China wants to launch asteroid-deflecting rockets to save Earth from Armageddon
After more than a year of delay due to the pandemic, the sun is beginning to shine on the world's largest solar telescope still under construction on Maui. In less than two weeks, a National Science ...

Work on Maui's solar telescope to end in November
Mercury's disproportionately massive core may be the result of the Sun's powerful magnetic influence rather than the consequence of a cataclysmic collision with another body in the ancient past, ...

Magnetism, not catalysm may be the cause of Mercury's giant iron core
Researchers at Stanford University found a new method for seeing through ice sheets using radio signals from the sun that could enable cheap, low-power and widespread monitoring of ice sheet evolution ...

Solar radio signals could be used to monitor melting ice sheets, study suggests
The facility set up by the International Advanced Research Centre for Powder Metallurgy and New Materials (ARCI), will validate solar thermal components such as solar receiver tubes and etc.
