systems involved were so complex and tightly coupled that an accident was, perhaps, the inevitable outcome. In “complexity”, Perrow described any system where two or more discrete failures might interact in unexpected ways.

~~Normal Accident Theory Explained — Event Safety Alliance~~

Having all these bad factors come together at the same time seems highly unlikely, but the Normal Accident Theory teaches that in a complex and highly coupled system like a nuclear power plant that an accident was inevitable. The Normal Accident Theory. According to the Normal Accident Theory, accidents are inevitable in systems that have two particular characteristics:

COMPLEXITY: Systems that have
