When it comes to making that special wooden toy, space is the new frontier. No longer. With Wooden Toy Spacecraft, the iconic wooden toy blasts off into the 21st century with this collection of 12 state-of-the-art spacecraft that you can build in a weekend. Going well beyond tired old rocket ships, woodworker Gonzalo Ferreyra offers up an intergalactic fleet of original designs that can fly proudly alongside the classics we know from film, television, and our real-world history of space exploration. "Winning car" secrets include extending the vehicle base, polishing axles, and modifying and aligning the wheels. Finally, the championship techniques of the "ultimate car" are revealed, allowing builders to shave those last tenths of a second off their times and go home with the trophy.
